Vita

Jing Ma received her B.S. and M.S. degrees in Electrical Engineering from Northwestern Polytechnic University (China) in 1993 and 1995, where she entered with the national college entrance exam exempted because of her excellent performance in high school. In 1996, she was awarded a research scholarship from Republic of Singapore and started to work as a research scholar in National University of Singapore, and she received the M.Eng. degree in Computer Engineering in 1998. In spring 1999, she began to pursue her Ph.D. study in Electrical and Computer Engineering at Virginia Tech with graduate research assistantship award. From May 2002 to November 2002, she worked at Bell Labs of Lucent Technologies as a research co-op. Her research interests including Electronic Design Automation, CAD Tool Development, Embedded system Design, DSP and its Implementations, and Software Engineering. Upon completion of her Ph.D. degree in Electrical Engineering, Jing Ma plans to move to Louisiana working as an Assistant Professor in the University of New Orleans.
