Chapter 1: Introduction

Dyck, Robert G. and Huang, Wei (2001). *Globalization and Sustainability in the Pearl River Delta*.

Conference Paper for World Planning School Conference, Shanghai, China, July, 2001.

Lin, G. C. S (1997). *Red Capitalism in South China: Growth and Development of the Pearl River Delta*.

Vancouver: University of British Columbia Press.

This book serves as the starting point model of my thesis. It describes the dramatic economic and spatial transformation of China's Pearl River Delta region over the past decade. The author reviews the processes behind the development and discusses the implications of such change. He systematically examines the transformation of the Chinese spatial economy to reveal the patterns of spatial and economic restructuring the delta, and provides three case studies that focus on rural industrialization, transport development, and the influence of Hong Kong.

Perry, Elizabeth J. and Mark Seldon, eds. (2000). *Chinese Society: Change, Conflict and Resistance*.

London and New York: Routledge.

Smil, Vaclav (1993). *China's Environmental Crisis: An Inquiry into the Limits of National Development*.

New York: M.E. Sharpe, Inc.

After China has become a very strong economic force in the global scheme, more and more researchers pay attention to its environmental problems. This book focuses more on the Chinese people's quality of life which is highly associated with environment quality, than physical environment indicators.

Yusuf, Shahid and Wu, Weiping and Evenett, Simon, eds. (2000). *Local Dynamics in an Era of Globalization: 21st Century Catalysts for Development*. Washington D.C.: Oxford University Press.

The book is a companion volume to the World Development Report 1999/2000 which assembles a selection of papers that relate to the unfolding of local dynamics in an increasingly integrated world environment. It has four subcategories on globalization and economic development: The world of globalizing forces, managing urbanization in a globalizing world, making decentralization work in a global economy, and building competitive cities for the 21st century. It is rich in globalization and urban change theories and case studies.
