

LIST OF TABLES

Chapter 4

Table 4.1. The supramolecular structures, their molecular formulae, calculated molecular weights and observed (ms) mass/charge ratios	96
--	----

Chapter 5

Table 5.1. Analyses of percentages of ammonium ion moieties in dimer 8 and supramolecular polymer 9 , and the average number of repeat units, n , in 9	109
--	-----

Chapter 6

Table 6.1. Association constants (K_{linear}) at 22°C and enthalpy and entropy for linear dimerization in acetone- d_6 /chloroform- d (1/1, v/v)	125
--	-----

Table 6.2. Association constants (K_{cyclic}) at 22°C and enthalpy and entropy for cyclic dimerization in acetone- d_6 /chloroform- d (1/1, v/v)	125
--	-----

Chapter 7

Table 7.1. Analyses of percentages of ammonium ion moieties in dimer 3a and supramolecular polymer 4a , and the average number of repeat units, n , in 4a	135
---	-----

Table 7.2. Analyses of percentages of ammonium ion moieties in dimer 3c and supramolecular polymer 4c , and the average number of repeat units, n , in 4c	136
---	-----

Chapter 8

Table 8.1. Association constants (K) for the 1:1 complex in acetone- d_6 at different temperatures	148
---	-----

Chapter 9

Table 9.1. The apparent “ K_a ” values for complexation of 5 and 7 as a function of [7]	164
--	-----

Table 9.2. Fraction of complexed crown ether moieties 8 as a function of [7]	164
--	-----

Table 9.3. The probability of pentads of **5** having mcm, mcc or ccm, and ccc sequences 167

Table 9.4. Effect of population of crown ether moieties occupied in polypseudorotaxane from **5a** on T_g (heating rate: 10°C/min) 171

Chapter 10

Table 10.1. Chemical shifts (δ) in acetone- d_6 at 22°C for **5a** (2.0×10^{-2} M), DB24C8 (2.0×10^{-2} M), and the 1:1 complex (2.0×10^{-2} M each) 184

Table 10.2. Chemical shifts (δ) in acetone- d_6 at 22°C for **6** (2.0×10^{-2} M), DB24C8 (2.0×10^{-2} M), and the 1:1 complex (2.0×10^{-2} M each) 184

Chapter 11

Table 11.1. Table of $[M]_0$, δ_o , p and n. δ_o values were obtained for H_g in the 1H NMR spectra at corresponding concentrations of $[M]_0$ (400 MHz, acetone- d_6 , 22°C) 200

Chapter 12

Table 12.1. Fraction of crown ether moiety complexed and n as a function time 225
