

List of Tables

Table 3.1 Equation of Time	21
Table 3.2 Data structure for Collector-One after calculation and addition of incident angle.....	22
Table 3.3 The relationship between the dependent variable and the independent variable in the binary regression table for Collector One.....	24
Table 3.4 Regression analyses and corresponding temperature range.....	26
Table 3.5 The prediction checking time slot.....	27
Table 3.6 Sensible heat gain from people and equipment for residential building.....	31
Table 3.7 The Ranch house usable energy calculating sub-files.....	38
Table 3.8 Two-story house usable energy calculating sub-files.....	41
Table 4.1 Coefficients for the regressions of the three collectors in different temperature range.....	53
Table 4.2 Annual heating energy saving for the three collectors.....	54
Table 4.3 The annual space heating percentage saving.....	54
Table 4.4 Heating energy dollar savings for the three collectors.....	55
Table 4.5 Domestic hot water preheating energy from the three collectors in heating season.....	57
Table 4.6 Preheating hot water heat from the three collectors on the ranch house on a summer day..	58
