

TABLE OF CONTENTS

Chapter I.	1
A. Introduction	1
B. Protest Over the Use of Nuclear Technologies	4
C. Explaining Social Protest	6
D. NASA's Risk	8
Chapter II.	13
A. A Brief Overview of the Cassini Mission and the Technology	13
B. Nuclear Power as the Enabling Technology for Space Exploration	14
C. Alternative Technologies to Space Nuclear Power	18
D. Proposed Human Missions to Mars: A Further Requirement for Nuclear Power	21
Chapter III.	24
A. How NASA Calculates Risk	24
B. NASA's Assessment of Risk Factors Associated with the Cassini Mission	25
C. NASA's Risk Assessment Communication	33
Chapter IV.	40
A. The Protest	40
B. The Florida Coalition for Peace and Justice	41
C. Primary Arguments by the Florida Coalition for Peace and Justice	42
D. History of the STOP CASSINI! Campaign	45
Chapter V.	55
A. Analytical Framework: Explaining Social Protest	55
B. Exploring the Framework	64
C. NIMBY and Knowledge-Based Theories	68
D. NOPE and Post-materialistic Values-based Theories	75
E. NOSE and Social Protest	80
F. A Word about NOSE and STS	85
Chapter VI.	90
A. Conclusion	90
B. Recommendations	91
C. Social Protest and Mars	94
D. Afterword	100
References	103

Appendices		113
A. A Summary of an Extant Study of Risk Perception and Nuclear Technologies for Space Exploration		113
B. Space Nuclear Power Launch History		117
Figures, Tables, and Boxes		
Figure 1	The Cassini Mission	13
Figure 2	The Cassini Spacecraft	13
Figure 3	Power Comparisons for Different Technologies	15
Figure 4	Map of Cape Canaveral, Florida	29
Figure 5	Death on the Plutonium Shuttle	49
Table 1	Environmental Effects of Plutonium Dioxide	25
Table 2	Range of Decontamination Methods for Various Land Cover Types	29
Table 3	Estimated Latent Cancer Fatality Risks	31
Table 4	Major Sources of Plutonium-238	32
Table 5	FCPJ Membership	43
Box 1	NASA Health Effects Risk Assessment	30
Box 2	Developmental Stages of Risk Management	33
Box 3	FCPJ Statement of U.S. Military Policies in Space	42
