

Vita

Cheung, Tze Chiu was born in Hong Kong, on July 3, 1966. He received his Higher Diploma in Electronic Engineering from the Hong Kong Polytechnic in June 1987. After his graduation, he worked as a Product Engineer in Video Technology Engineering Limited. In January 1989, he was transferred to Technophone Manufacturing Limited, a joint-venture company between Video Technology Engineering Limited and Technophone, as a Senior Test Engineer. In 1992, he joined Wong's Electronics Company, Limited as a Senior RF Engineer, where he worked on the design and development of cordless and analog cellular phones.

In March 1995, he moved to America and resided in Brooklyn, New York. He pursued his undergraduate degree in Polytechnic University and received his Bachelor of Science degree in Electrical Engineering in June 1997. From 1996 to 1997, he worked in Newtronix Communications, Inc. as a part-time engineer. He came to Virginia Tech in the fall of 1997 for his master study in Electrical Engineering. In January 1998, he joined the Center for Wireless Telecommunications at Virginia Tech, where he worked on the 2GHz W-CDMA radio transceiver as his master thesis topic.
